# Red Cat Holdings Announces Record Revenue for First Quarter of Fiscal 2024 and Provides Revenue Guidance for Fiscal Second and Third Quarters

## Strong business outlook and visibility supported by current purchase orders

SAN JUAN, Puerto Rico, Sept. 11, 2023 (GLOBE NEWSWIRE) -- Red Cat Holdings, Inc. (Nasdaq: RCAT) ("Red Cat" or the "Company"), a drone technology company integrating robotic hardware and software for military, government, and commercial operations, announces revenue for the first quarter of fiscal 2024 (three months ending July 30, 2023) ahead of its quarterly filing and provides revenue guidance for the second and third quarters of fiscal 2024.

Revenue in the fiscal first quarter for the three months ending July 30, 2023 was \$1.75 million. This revenue is entirely from the Company's Enterprise Division and specifically from its Teal Drones ("Teal") subsidiary that sells drones predominantly to the military and other public agencies.

Given the previously announced and pending asset sale of the Company's Consumer Division to Universal Machines, GAAP (Generally Accepted Accounting Principles) rules dictate that revenue from the Company's Consumer Division be classified as Discontinued Operations. Revenue from Discontinued Operations will no longer be reported.

Revenue for the fiscal second quarter (three months ending October 31, 2023) is expected to be \$3.0 million, and revenue for the fiscal third quarter (three months ending January 31, 2024) is expected to be \$5.0 million. Like the fiscal first quarter preliminary results, only revenue from the Company's Enterprise Division is included in these projected figures. Thus, combined revenue from the first three quarters of fiscal 2024 is expected to be nearly \$10 million, from the Company's Enterprise Division.

The current outlook is supported by approximately \$6 million in signed purchase orders and are expected to be fulfilled by the end of the fiscal third quarter. The Company anticipates additional purchase orders over the next 45 days given the current seasonally strong period of federal budget activity.

"The Teal team brought a brand new product, the Teal 2, from zero revenue to almost \$10 million in sales in just 4 months," commented Red Cat CEO Jeff Thompson. "We expect to be at a \$20 million revenue run-rate next quarter, our fiscal Q3.

"We designed the Teal 2 to meet the technical requests and features sought by our target customer, the warfighter, such as advanced proficiency for nighttime operations. We believe

we are well positioned as new opportunities arise, such as the Department of Defense's recently announced Replicator Initiative. The Replicator Initiative intends to purchase thousands of small, smart drones to counter threats from China and other countries. Our team is committed to assisting the DOD achieve these new goals," concluded Thompson.
